About Us

Based in the heart of West Norfolk, Logistic Solutions is a privately-owned, independent, freight and haulage company. We are dedicated to providing a first-class, professional and reliable service, and we offer a flexible and personal approach tailored to your needs.

Background:

We are a second-generation family business, and we are immensely proud of the company we have built up and the reputation we maintain for quality and reliability. We deal directly with all our customers, which benefits you because you speak only with the decision-makers, whilst we benefit from knowing exactly what you expect from us every time.

Our clients:

We are proud to work in loyal partnership with many successful local businesses, and we have also built lasting relationships with internationally renowned brands including McCain, Lantmännen Unibake, LePain Quotidien and UniChem.

Our fleet:

We deliver goods throughout the UK and mainland Europe in our premium fleet of temperature-controlled articulated vehicles, curtain-sided lorries and boxed vans. This flexibility and range allows us to ensure we offer the quickest and most efficient transport option for you, no matter what the volume or type of your consignment.

Our promise:

We believe passionately in providing a professional, consistent and thoroughly honest service, and we know that our customers rely on us to keep the delivery promises we make.

Transport solutions tailored to your needs

Temperature-Controlled Transport

We are a leading provider of temperature-controlled transport services and we specialise in delivering full-load consignments throughout the UK and Benelux regions of Europe.

Our state-of-the-art refrigerated vehicle fleet can maintain constant temperatures from +28°C to -27°C, which ensures goods are preserved in a steady, controlled environment throughout their transit.

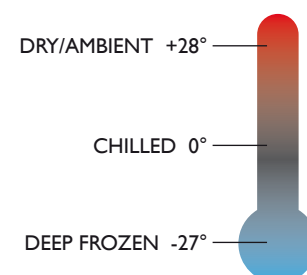

Many of our customers are international blue-chip brands, whose reputations rely on the quality and consistency of our services.

European leaders in temperature-controlled transport

Consignments we regularly transport include:

- Pharmaceutical and personal care products
- Medical goods
- Frozen foods
- Fresh bread and pastry products
- Perishable foods

Pallet Consignments

We transport palletised goods throughout the UK and Europe, and offer an affordable and reliable service for quarter, half and full pallets. No job is too big or too small, and we treat every consignment with the same sense of urgency and priority.

- Next-day and economy deliveries throughout mainland UK
- Quick and efficient delivery to 38 countries across Europe

Part of the UK's no.1 palletised distribution network

As a member of Pall-Ex, the multi-award-winning distribution network, we are able to minimise our overheads on palletised transport, which allows us to pass the savings on to you. Our service includes the following benefits:

- Flexible collection times
- Competitive rates
- Fully trackable consignments
- Personal and reliable service
- Home delivery
- Tail-lift facilities
- Treading lightly and leaving only green footprints

Service-driven, cost-focused

UK Express Same-Day Haulage

We know that flexibility and speed are key when it comes to moving your time-sensitive and last-minute consignments. Our express haulage division provides a fast and reliable passage for dry freight consignments whose transportation needs fall outside the remit of our standard pallet network.

Dedicated fleet vehicle: Book a dedicated fleet vehicle for your full-load consignment, for non-palletised goods, or for a consignment which is subject to specific transport conditions. We provide a world-class, cost-effective service, and offer collection and delivery throughout the UK.

Express timings to suit you: For urgent, same-day or next-day deliveries, our premium haulage and freight service allows you to dictate a pick-up and delivery schedule that works for you.

Size doesn't matter: From individual packages and routine deliveries to bulk haulage, our modern fleet includes a range of transport options to suit:

- 44 tonne articulated curtain-side
- 1.5, 7.5 & 18 tonne rigid curtain-side with tail lift
- Boxed vans

Green footprints: Our modern, high specification fleet is subject to a stringent maintenance schedule in order to minimise environmental impact, and allow us to offer deliveries within the London low emission zone.

Never compromising on quality

Reliability and flexibility you can trust.

As a member of the Road Haulage Association we operate to the RHA Conditions of Carriage 2009 and CMR (where necessary). We hold *goods in transit* insurance to meet and cover the requirements of these conditions.

We are members of the UK's number one palletised delivery network, Pall-Ex, which means you can rely on the same fast and efficient service every time.
